

# Want a Gutter Alternative?

Protects doorways  
and gardens from  
rain. Sleek and  
hardworking –  
the *V-11  
Rain Diverter*  
is a great  
alternative  
to traditional  
gutters.

# V-11 Rain Diverter is Here

*Vertex  
Specialty  
Fabrications  
has been fabricating  
and installing specialty  
sheet metal products for several  
years on some of Maine's premier homes.*

Benefits of the 

- Economical solution for isolated areas
- Keeps water contained
- Strong design doesn't easily bend
- Minimal maintenance
- Attractive, low profile design
- Easy to install

The new  is available in a variety of colors – white, black, copper, bronze and mill-finish. The copper is fabricated from 20oz. material, other colors are fabricated from aluminum at a thickness of .032. Available in 60” and 120” sections that can be used to create long sections of staggered coverage or shorter sections for over doorways or other small areas.

Vertex Specialty Fabrications also provides custom gutters, drip edges, chimney and ridge caps, as well as cupola and portico roofs.
